## Awareness in 'December the Second Girls' School for Basic Education'

Emirates Thalassemia Society has always sought to deliver its message to all members and segments of the community in order to spread awareness about Thalassemia, especially amongst the youth of a promising future generation. The Society also continuously aims to control the spread of the fatal disorder in newly born infants.

In continuation to the Thalassemia awareness campaigns, a team of Emirates Thalassemia Society visited the 'December the Second Girls' School for Basic Education' on 4<sup>th</sup> of June 2013 for the distribution of the awareness materials for all the students from Grade 1 to Grade 5, in official coordination with the school management. Thalassemia society was present to mark this occasion & distributed the puzzle booklets & magazines & brochures in

the school. Each material has been designed to specifically target the attention of the students of different ages & contains valuable information that will benefit students and their families. To make it more appealing it also has a drawing contest & a prize for the best drawing. The young students showed much enthusiasm and interest towards learning about Thalassemia. The administrative staff of the school also commended the Emirates Thalassemia Society for its efforts to spread awareness by reaching out to the youth in an active way to secure their future from a fatal disorder like Thalassemia.

Emirates Thalassemia Society hopes to achieve same keenness and recognition from all the youth of UAE in order to achieve fruitful cooperation, which facilitates the task to reach the desired goals
